Only Hotels Sales

From now on you will have possibility to publish "only hotel" prices without creating any package or price list. For using this new TourVisio technology you have to do some configuration which we'll show you on the screenshots below:

 Under Definition / Hotels you have to edit your Hotel which you want to activate for "Only Hotels Sales". Under the tab Parameters you have to activate the click "Allow only hotel sales".

4. For activating your hotels to the sale you should activate TVCC (TourVisio ControlCenter) task (Package Pricelist Process Engine) which starts the process automatically with intervals. If you have an old version of TVCC without this task, you may download and upgrade the newer version from support.tourvisio.com addres.

5. In case any change in contract or getting new SPO price will be calculated by TVCC automaticaly. In case any change or new Spo entry TourVisio will put first the related hotel in calculation queue. It is possible to observe this queue from Monitoring / Hotel Sale Queue for TVCC. Records in this monitor will be deleted by TVCC after calculation.

7. Also TVCC will **update** your Hotel SPO's and contract SPO's.

For Hotel SPO and contract SPO calculation, from now on we have new feature. In Hotel card, parameters segment you will see SPO Calculation Method; Application Type or Combine Table. In Case you select **Use Combine Table** you will have two additional tools in Contract SPO segment of Contract and also in Hotel SPO.

Also you may select one by one the combined and non-cumulative ones by using SPO combine.

In Hotel SPO you have SPO combine option too.

8. Finally you can **do** reservations by using the Price Search Wizard. For **making** reservations you have to **use** tab "Only Hotels". Your prices for B2B or B2C will be automatically updated after the updating process done successfully. For b2b and b2c (also web services) usage you may contact with support team.
